Contents of 1972 Volume

VOLUME 7, NUMBER 1, JANUARY 1972

I. Height distribution of minor neutral constituents.

Minor neutral constituents in the mesosphere and lower thermosphere. *Darrell F. Strobel* 1

Seasonal effects on distributions of minor neutral constituents in the mesosphere and lower thermosphere. *T. Shimazaki and A. R. Laird* 23

Measurements of mesospheric ozone from observations of the 1.27μ band. *W. F. J. Evans and E. J. Llewellyn* 45

II. Sources of ionization.

Improved photoionization rates of $O_2(^1\Delta_g)$ in the *D* region. *D. E. Paulsen, R. E. Huffman, and J. C. Larrabee* 51

Electron densities below 100 kilometers at midlatitudes (L = 2.5–4.0) during solar minimum and maximum years: preliminary model calculations. *A. H. Manson* 57

Nightglow evidence of precipitating energetic electrons in the midlatitude nighttime *D* region. *T. A. Potemra and A. J. Zmuda.* 63

Ionization contribution by cosmic X rays. *A. P. Mitra and Y. V. Ramanamurty* 67

III. Positive ion chemistry.

Positive ion chemistry of the *D*- and *E*-regions. *T. M. Donahue* 73

Results of concentration and mobility measurements for positively and negatively charged particles taken between 85 and 22 km in sounding rocket experiments. *G. Rose and H. U. Widdel* 81

Supersonic and subsonic measurements of mesospheric ionization. *L. C. Hale, L. C. Nickell, B. Kennedy, and T. A. Powell* ... 89

Positive-ion composition in the lower ionosphere. *B. Krankowsky, F. Arnold, H. Wieder, J. Kissel, and J. Zähringer* 93

Positive ion mass spectrometer observations in the *E* region. *C. Y. Johnson* 99

The study of *E*-region ion concentration and composition by incoherent scatter radar. *J. V. Evans and W. L. Oliver* 103

IV. Reaction rates deduced from laboratory and ionospheric measurements.

Recent laboratory measurements of *D*- and *E*-region ion-neutral reactions. *F. C. Fehsenfeld and E. E. Ferguson* 113

Reactions involving cluster ions. *F. E. Niles, J. M. Heimerl, G. E. Keller, and L. J. Puckett* 117

Laboratory measurements of ion chemistry in a simulated disturbed ionosphere. *M. N. Hirsh and P. N. Eisner* 125

Effective electron loss rates in the lower *D* region during the decay of solar X-ray flare events. *L. E. Montbriand and J. S. Belrose* 133

V. Electron-density profiles.

Information on the *D*- and *E*-region electron density profiles. *E. V. Thrane* 143

Measurements of *D*- and *E*-region electron densities by the incoherent scatter technique at Millstone Hill. *G. W. Armistead, J. V. Evans, and W. A. Reid* 153

The diurnal and seasonal variation of electron densities in the midlatitude *D* region under quiet conditions. *T. N. R. Coyne and J. S. Belrose* 163

Positive ions and the winter anomaly. *J. D. Mitchell, L. C. Hale, R. O. Olsen, J. Randhawa, and R. Rubio* 175

Results of an experimental investigation of correlations between *D*-region neutral gas winds, density changes, and short-wave absorption. *G. Rose, H. U. Widdel, A. Azcárraga, and L. Sanchez* 181

Stratospheric-ionospheric interaction during the movement of a planetary wave in January 1967. *Ben H. Williams, Robert O. Olsen, and Marvin D. Kays* 193

VOLUME 7, NUMBER 2, FEBRUARY 1972

A transportable 16-GHz solar telescope for atmospheric transmissivity measurements. *Kevin C. O'Brien, Richard C. Heidt, and Gerald J. Owens* 215

Correction of satellite tracking data for an arbitrary tropospheric profile. *John W. Marini* 223

Antarctic ice cap attenuation rates of VLF signals determined from short and long great circle paths. *J. H. Crary and D. D. Crombie* 233

Ground backscatter observed with high resolution oblique sounders. *Roy P. Basler and Thomas D. Scott* 239

Measuring the vertical angles of arrival of HF skywave signals with multiple modes. *John M. Kelso* 245

Interferometric direction finding on an FM CW ionosonde. *W. M. Sherrill, T. C. Green, and P. E. Martin* 251

Scattering of HF radio waves by a spherical electron cloud. *Milton M. Klein* 257

Nonlinear whistler propagation through the ionosphere. *B. Buti and V. K. Tripathi* 269

Orthogonality of VLF height gains in the earth ionosphere waveguide. *R. A. Pappert and R. R. Smith* 275

Synthesis of data obtained at Jicamarca, Peru, during the September 11, 1969, eclipse. *D. L. Sterling, W. B. Hanson, and Ronald F. Woodman* 279

A theory of scattering from irregularities in a magneto-ionic medium. *D. M. Simonich and K. C. Yeh* 291

RF sheath and admittance characteristics of a spherical plasma probe. *J. R. Kan* 301

Transmission and reflection of a wave obliquely incident on a nonuniform magnetized plasma. *A. L. Peratt and H. H. Kuehl* . 309

On the maximum and minimum energy transmitted through thin, dispersive, dielectric media. *Joseph T. Mayhan*..... 325
Scattering in velocity-dependent systems. *Dan Censor*..... 331
Radiation from conical surfaces used for high-speed spacecraft. *Constantine A. Balanis*..... 339

VOLUME 7, NUMBER 3, MARCH 1972

Preface. *S. Matsushita and E. K. Smith*..... 345
I. Radio-wave observations.
Comments on the first intensive period of observation of E_s in Europe. *L. G. Bossy*..... 347
Fifty-megahertz E_s, 1964–1970. *Patrick J. Dyer*..... 351
The structure of sporadic *E* from a radio experiment. *J. D. Whitehead*..... 355
II. Rocket observations.
Sporadic-*E* formation by wind shear, comparison between observation and theory. *S. Kato, T. Aso, T. Horiuchi, J. Nakamura, and T. Matsuoka*..... 359
Sporadic-*E* and wind-profile interrelation over Hawaii. *Lawrence B. Smith and J. W. Wright*..... 363
Rocket observations of sporadic-*E* layers. *L. G. Smith and E. A. Mechtly*..... 367
Ionospheric winds and viscous dissipation. *N. W. Rosenberg and S. P. Zimmerman*..... 377
III. Theories.
Some recent work on sporadic-*E* theory. *J. D. Whitehead*..... 381
Theory of midlatitude sporadic *E*. *David Layzer*..... 385
Atmospheric metal ion chemistry. *E. E. Ferguson*..... 397
Winds in *E* region. *J. D. Whitehead*..... 403
Influence of the tidal wind system on the frequency of sporadic-*E* occurrence. *R. D. Harris and R. Taur*..... 405
Lunar influences on sporadic *E*. *J. D. Tarpley and S. Matsushita*..... 411
Cross-field instability for the formation of sporadic *E*. *Susumu Kato*..... 417
The position of electron density maxima with vertical ionization movements. *J. D. Whitehead*..... 425
Three dimensional analysis of the cross-field instability in the ionosphere. *Tetsuya Sato and Takao Tsuda*..... 429

VOLUME 7, NUMBER 4, APRIL 1972

Propagation in an evaporation duct: Results in some simple analytic models. *R. I. Joseph and G. D. Smith*..... 433
Enhanced microwave absorption in the lower atmosphere of Venus. *Kurt R. Richter*..... 443
Analytic ray solutions for high-frequency radio-wave propagation through plane stratified ionospheric models. *Gary H. Price*. 449
Mode coupling in partial reflections from the ionosphere at vertical incidence. *Denis J. Connolly and B. Samuel Tanenbaum*.. 457
VLF phase changes produced by particle precipitation into the geomagnetic anomaly during solar proton events. *A. Mendes and S. Ananthakrishnan*..... 465
Measurement of *E*-layer effective recombination coefficient during solar flares. *L. S. Wagner and G. D. Thome*..... 469
Excitation of parametric instabilities by radio waves in the ionsophere. *J. A. Fejer and Egil Leer*..... 481
The impedance characteristic of a spherical probe in an isotropic plasma. *J. Tarstrup and W. J. Heikkila*..... 493
Nonlinear sheath admittance, currents, and charges associated with high peak voltage drive on a VLF ELF dipole antenna moving in the ionsophere. *I. P. Shkarofsky*..... 503

VOLUME 7, NUMBER 5, MAY 1972

Radio occultation measurements of the Mars atmosphere with Mariners 6 and 7. *Joseph S. Hogan, Richard W. Stewart, and S. I. Rasool*..... 525
Plasma transport in the equatorial *F* region. *J. P. McClure and V. L. Peterson*..... 539
Stable solutions of ionospheric fields in the propagation of ELF and VLF waves. *Janis Galejs*..... 549
Amplitude probability distribution of radio waves reflected from traveling ionospheric disturbances. *S. K. Srivastava, S. M. Pradhan, and B. A. P. Tantry*..... 563
The empirical connection of riometer absorption to solar protons during PCA events. *T. A. Potemra*..... 571
Computation of dispersion curves for a hot magnetoplasma with application to the upper-hybrid and cyclotron frequencies *D. B. Muldrew and M. F. Estabrooks*..... 579
The effect of a buried conductor on the subsurface fields for line source excitation. *James R. Wait*..... 587
Arrays with electrically long elements. *Ronold W. P. King and Sheldon S. Sandler*..... 593
Green's functions for surfaces of revolution. *Roger F. Harrington and Joseph R. Mautz*..... 603
LETTERS: Visible light flux affecting the *D* layer. *G. J. Gassmann and R. A. Wagner*..... 613
CALL FOR PAPERS: 1972 USNC/URSI fall meeting..... 617

VOLUME 7, NUMBER 6, JUNE 1972

ADA: An instrument for measuring attenuation due to rain over slant paths. *I. I. Zawadzki and R. R. Rogers*..... 619
Propagation delay in the atmosphere. *D. M. LeVine*..... 625

Radar-derived statistics on slant-path attenuation at 10 GHz. *R. R. Rogers* 631
Complex permittivity of the Antarctic ice sheet in the VLF band. *I. C. Peden, G. E. Webber, and A. S. Chandler* 645
A technique for describing the Antarctic *D* region at VLF based on waveguide dispersion measurements. *G. E. Webber and I. C. Peden* 651
Multiple-pulse incoherent-scatter correlation function measurements. *D. T. Farley* 661
The M.I.T. K_u-band radio interferometer. *G. D. Papadopoulos and B. F. Burke* 667
Theory of wave propagation along a thin wire parallel to an interface. *James R. Wait* 675
On steepest descent evaluation of an integral describing transient wave propagation in anisotropic plasmas. *Kenneth C. Chen and Jui Lin Yen* 681
LETTERS: Attenuation of electromagnetic waves in the earth crust waveguide from ELF to VLF. *James R. Wait and Kenneth P. Spies* 689

VOLUME 7, NUMBER 7, JULY 1972

Focusing of intense electromagntic waves in ducts with saturating nonlinearity. *C. J. K. Virmani and P. K. Dubey* 691
On the boundary conditions in theoretical model calculations of the distributions of minor neutral constituents in the upper atmosphere. *Tatsuo Shimazaki* 695
An investigation of the ionospheric *D* region at sunrise, 1, Time variations of ozone, metastable molecular oxygen, and atomic oxygen. *R. P. Turco and C. F. Sechrist, Jr.* 703
An investigation of the ionospheric *D* region at sunrise, 2, Estimation of some photodetachment rates. *R. P. Turco and C. F. Sechrist, Jr.* 717
An investigation of the ionospheric *D* region at sunrise, 3, Time variations of negative-ion and electron densities. *R. P. Turco and C. F. Sechrist, Jr.* 725
Synthesis of Jicamarca data during the great storm of March 8, 1970. *Ronald F. Woodman, D. L. Sterling, and W. B. Hanson.* 739
Chatanika, Alaska, auroral-zone incoherent-scatter facility. *R. L. Leadabrand, M. J. Baron, J. Petricekś, and H. F. Bates...* 747
Pattern synthesis of linear arrays using Fourier coefficient matching. *W. A. Imbriale, J. E. Heller, R. Mittra, and J. B. Cruz..* 757
LETTERS: Incoherent scatter observations at Arecibo using compressed pulses. *G. Ioannidis and D. T. Farley* 763
CALL FOR PAPERS: 1972 USNC/URSI fall meeting 767

VOLUME 7, NUMBERS 8, 9, AUGUST–SEPTEMBER 1972

Foreword. *K. Rawer* 769
Antennas in plasma: Characteristics as functions of frequency. *K. G. Balmain* 771
The behavior of antennas in plasma as function of the frequency of excitation: Summary report. *M. P. Bachynski* 777
Electron resonances observed with topside sounders. *D. B. Muldrew* 779
Transient responses: Resonance spikes of topside sounders: Summary report. *M. Petit* 791
Laboratory plasmas: Summary report. *Tomiya Watanabe* 795
Plasma turbulence: Theories and experiments. *K. W. Gentle* 799
Instabilities and turbulence: Summary report. *P. E. Vandenplas* 809
VLF emissions in the magnetosphere. *M. J. Rycroft* 811
VLF emissions: Summary report. *I. Kimura* 831
Review of wave excitation in plasmas. *Tudor Wyatt Johnston* 833
Excitation: Summary report. *K. Rawer* 843
Linear and nonlinear coupling of waves in plasmas. *R. W. Larenz* 845
Coupling: Summary report. *L. B. Felsen* 853
The instability of inhomogeneous plasma streams. *I. Zhelyazkov and A. A. Rukhadze* 857
Attenuation of waves in plasmas. *Kurt Suchy* 871
Attenuation and two-stream-instability: Summary report. *R. W. Larenz* 885
Final discussion: Summary report. *K. Rawer* 887

VOLUME 7, NUMBER 10, OCTOBER 1972

The effect of the subsurface on the depolarization of rough-surface backscatter. *John W. Rouse, Jr.* 889
A practical evaluation of earth-backscatter simulation and an estimate of the HF ground-scatter coefficient. *Edwin L. Althouse and John R. Davis* 897
Some results of a mode-conversion program for VLF. *Richard A. Pappert and Floyd P. Snyder* 913
Measurement of best time-delay resolution obtainable along east-west and north-south ionospheric paths. *J. T. Lynch, R. B. Fenwick, and O. G. Villard, Jr.* 925
The transient electromagnetic response of a spherical shell of arbitrary thickness. *David A. Hill and James R. Wait* 931
Rayleigh scattering cross sections. *R. E. Kleinman and T. B. A. Senior* 937
Axial-radar cross section of finite cones by the equivalent current concept with higher order diffraction. *W. D. Burnside and L. Peters, Jr.* 943

Velocity-dependent multiple scattering by two thin cylinders. *Dan Censor*..... 949
Radiation from a flanged parallel-plate waveguide. *K. Hongo*..... 955
Radiation from an open-ended waveguide with extended dielectric loading. *T. T. Fong*..... 965
Reflection and transmission of electromagnetic waves by a moving inhomogeneous medium. *K. Tanaka and K. Hazama*.. 973
Effects of pseudosonic and electroacoustic waves on the radiation of a plasma-coated spherical antenna. *Garth Maxam and Kun-Mu Chen*..... 979

VOLUME 7, NUMBER 11, NOVEMBER 1972

Bistatic radar detection of high altitude clear air atmospheric targets. *R. J. Doviak, J. Goldhirsh, and A. R. Miller*..... 993
Focusing of waves in ducts. *M. S. Sodha, A. K. Ghatak, D. P. Tewari, and P. K. Dubey*..... 1001
Modeling of atmospheric noise. *Arthur A. Giordano and Fred Haber*..... 1011
Wider aperture sine-cosine direction finders. *Douglas N. Travers and Terry C. Green*..... 1025
Automatic $N(h, t)$ profiles of the ionosphere with a digital ionosonde. *J. W. Wright, A. R. Laird, D. Obitts, E. J. Violette, and D. McKinnis*..... 1033
An improved true-height reduction technique. *E. Kantarizis and J. D. Whitehead*..... 1045
Radar measurement of ionosphere motion in the presence of current-induced spectral assymmetries. *Charles L. Rino*.... 1049
On *D*-region electron heating by a low-frequency terrestrial line current with ground return. *R. V. Row and M. H. Mentzoni*.. 1061
CALL FOR PAPERS: Chapman Memorial Symposium on Magnetospheric Motion..... 1067
ANNOUNCEMENT: USNC/URSI Meeting..... 1068

VOLUME 7, NUMBER 12, DECEMBER 1972

Time- and frequency-domain characterizations of multipath propagation at 910 MHz in a surburban mobile-radio environment. *D. C. Cox*..... 1069
On the effect of the vertical drift in the equatorial *F* region. *Mao-Fou Wu*..... 1079
Some aspects of the day-to-day variability of the equatorial anomaly: American and Japanese sectors. *C. M. Rush and D. Miller*..... 1085
Estimation of the cumulative amplitude probability distribution function of ionospheric scintillations. *H. E. Whitney, J. Aarons, R. S. Allen, and D. R. Seemann*..... 1095
Remote probing of inhomogeneous media using parameter optimization techniques. *M. Mostafavi and R. Mittra*..... 1105
On the reflection of FM electromagnetic pulses from the ionosphere. *M. S. Sodha, I. Rattan, and A. K. Chakravarti*..... 1113
Input resistance of a short dipole antenna in a warm uniaxial plasma. *G. Baenziger and H. H. Kuehl*..... 1117
Net-field polarization in a magnetically biased plasma. *W. V. T. Rusch and C. T. Stelzried*..... 1131
The integral equation and boundary conditions for a cylindrical antenna in a warm plasma. *Douglas H. Preis*..... 1143
On the electric field of a moving test charge. *M. Y. Yu, L. Stenflo, and P. K. Shukla*..... 1151
Propagation of electromagnetic waves in media which vary slowly with position and time. *Ronald L. Fante*..... 1153
A system-synthesis approach to the inverse problem of scattering by smooth convex-shaped scatters for the high-frequency case. *Francis E. Vandenberghe and Wolfgang M. Boerner*..... 1163
ANNOUNCEMENT AND CALL FOR PAPERS: Symposium on Methods of Measurements and Results of Lower Ionosphere Structure..... 1171
ANNOUNCEMENT AND CALL FOR PAPERS: Symposium on Dynamics, Chemistry, and Thermal Processes in the Ionosphere and Thermosphere..... 1172
Contents of 1972 volume..... 1173
Author index..... 1177
